

E3-Modelling is a knowledge-intensive company that provides consulting services based on large-scale empirical modelling of the economy-energy-environment nexus. The company develops and operates a suite of models, including PRIMES and GEM-E3, two renowned modelling tools used extensively in the preparation of major impact assessment studies and scenario building of the European Commission.

Information Security is a cornerstone of E3-Modelling's work. It includes policies, procedures, guidelines and associated resources and activities, aimed at protecting information assets.

E3-Modelling is committed to protecting information in all forms, from source to use, in a consistent and secure manner. The company adopts a risk-oriented approach to information security and abides by international standards and established good practices.

The management of E3-Modelling is committed to adopting and maintaining an Information Security Management System according to the international standard ISO/IEC 27001:2017. We are all committed to satisfying applicable requirements, and any requirement related to information security and quality of the work performed.

The Information Security Quality Policy is reviewed to remain in line with the context and the strategic direction of the organization.
